

Model 4000

ONLY FOR YOU

Sit extremely comfortably in a chair that keeps things in balance no matter how you choose to sit. The Model 4000 is a work chair with an elbow-joint tilt mechanism, with the axle of rotation located just under the front of the seat. Tilt range: from 17° backwards to 4° forwards. Correctly adjusted, the tilt mechanism offers very good balance, making the chair very accommodating to movement.

- Tilt resistance can be adjusted to match the user's height and weight
- The backrest is freely height adjustable • Freely adjustable backrest angle
- The chair is freely height adjustable • Six-position seat depth adjustment within a range of 8 cm • Available as ESD model • Certified for 24 hours of use • As standard the chair is fitted with castors for soft floors, a black base and a polyether foam seat.

1. With its four elastic bands, the backrest adjusts to the natural shape of your back. Your back receives maximum support and is held in a natural upright position with a minimum of muscle strain. This relieves the muscles and enables them to relax.

2. Armrests can offer comfort to those who wish to vary their work posture. Malmstolen offers several different armrests among its accessories. All armrests are height adjustable and easily attached and removed. Moreover, ErgoFlex also features depth adjustment and can be rotated 25° inwards.

3. The adjustable headrest is an optional accessory that relieves head and neck muscles. Perfect for those who like to use the chair's tilt function and to work in a reclined position now and then.

4. The aluminium base is available in two models - polished and black (painted). To keep your chair mobile, you can also choose castors that suit your workplace floor. Soft castors for hard floors and hard casors for soft floors.
