

# Model R2

ALWAYS ON THE GO

Adjust the seat height and, if necessary, the backrest height of the Malmstolen R2 and your office chair is ready to use. The first time you sit on this chair, you'll sit correctly intuitively. The tilt mechanism takes care of its balance for you.

- Design based on a brand new mechanism
- The tilt mechanism takes care of its balance for you
- The tilt mechanism moves about 11° backwards and 4° forwards
- Backrest available in two versions, High and Medium
- The backrest is height adjustable
- The seat height is freely adjustable
- Integrated ZenXit module ensures an extremely comfortable backrest

**1.** The self adjustable ZenXit system in the backrest suits 95% of all users without the slightest adjustment. This ability to adapt means that your body receives support and relief that is hard to beat, making it easy to relax.

**2.** The Medium backrest is extremely comfortable. Suitable for people who prefer a slightly smaller backrest.

**3.** The adjustable headrest is an accessory that relieves head and neck muscles. Perfect for people who like to use the tilt function on their chair and to work in a reclined position now and again.

**4.** Nylon base with a smaller diameter (68 cm) so that the chairs can more easily be used around, for example, a conference table. To keep your chair mobile, you can also choose castors that suit your workplace floor. Soft castors for hard floors and hard castors for soft floors.

**5.** The chair does not have armrests. This is to make it easier to adapt to different types of workplace. Rest your arms on your desk instead.
