

Model High5

A REAL TREAT FOR THOSE WHO HAVE TROUBLE SITTING STILL

A quick rest while on the go, or support and relaxation when you plan to sit for a while. High5 is a sitting solution that reduces the strains to which your body is easily exposed by other so-called sit-stand chairs, yet still retains freedom of movement and variation. Malmstolen High5 optimises the weight distribution between the sitting bones and the inner thighs, but still offers several different sitting positions.

The front of the seat offers temporary support and rest while standing. If you sit well back in the seat, the high, narrow backrest offers good support, relief and relaxation. No matter which, freedom of movement remains, thanks to the built-in tilt mechanism. Natural movements and improved blood circulation are other benefits.

- The seat is height adjustable • Seat height of standard model about 58-79 cm • Seat depth adjustment of 8 cm • The backrest is height adjustable 10 cm • Freely adjustable angle between backrest and seat • Optional headrest, with adjustable height, depth and support angle • Built-in tilt mechanism, adjustable to user's weight • As standard the seat is fitted with castor wheels for soft floors, a black base and a polyether foam seat with LiquiCell membrane.

1. The adjustable headrest is an optional accessory that relieves head and neck muscles. Perfect for those who like to use the chair's tilt function and to work in a reclined position now and then.

2. The saddle seat optimizes weight distribution between the sitting bones and the inner thighs. At the same time, this seat offer several ways to sit; on the edge of the seat for a quick rest or well back on the seat for maximum support and relaxation. The seat has a LiquiCell membrane.

3. The high, narrow backrest offers very good support that provides relief and relaxation. The chair's tilt mechanism enables great freedom of movement when working.

4. The aluminium base is available in two models - polished and black (painted). To keep your chair mobile, you can also choose castors that suit your workplace floor. Soft castors for hard floors and hard casors for soft floors.
